

Section of Clinical Specialists and Scientists

Mission

The ASHP Section of Clinical Specialists and Scientists is dedicated to improving patient care by serving as the conduit for translating scientific advances in drug therapy and clinical therapeutics into the practice of pharmacists and advocating practice development and advancement.

Vision

- The ASHP Section of Clinical Specialists and Scientists, as a component group of the American Society of Health-System Pharmacists, represents pharmacists who are therapeutic experts, scientific advisors and clinical scientists. In pursuing its agenda the Section will:
- Serve as the primary community for clinical specialists and scientists within ASHP;
- Effectively communicate the value of membership;
- Serve the unique pharmacy-based needs of ASHP's science-oriented membership by providing the mechanism for clinical specialists to be connected with broader research and professional issues;
- Actively encourage and facilitate involvement and participation in the Section, ASHP, and in the profession;
- Encourage and support networking and among members;
- Cultivate and develop members who are the future leaders of the Section, ASHP, and the profession;
- Serve to translate the results of scientific inquiry and facilitate the integration of scientific advances into the practice of pharmacy;
- Facilitate partnerships with other professional organizations to develop products, educational programs, and services that meet the unique needs of the Section's membership.
- Be fully integrated in ASHP governance and policy development, serving as the voice for clinical specialists and scientists in ASHP;

Section of Clinical Specialists and Scientists

- Stimulates the advancement of clinical pharmacy practice through encouragement of practice research and the publication and dissemination of knowledge.
- Encourages and facilitates the dissemination and publication of scientific knowledge.
- Involves and actively engages new practitioners in the work of the Section and ASHP.
