

2018 Midyear Clinical Meeting December 2-6, 2018 Anaheim, California

Suggested Proposal Topics

Below are suggested topics for submission. Feel free to submit on a topic not listed below.

Informatics	Leadership/Management
 Managing big data 	Innovative practice models
 Cybersecurity 	 Reimbursement for pharmacy services/products
Clinical decision support	High cost drugs/formulary
 Human computer interface-Usability 	Supply chain integrity
Genomic data	Leadership development
 Telehealth 	Mentorship
 Digital health (digiceuticals) 	Succession planning
Artifical intelligence	Credentialing
• Disruptors to the practice of pharmacy (i.e. Amazon)	Managing challenging residents or staff/designing
 Technology updates-bar coding, smart pumps 	performance improvement plans
 Interoperability 	Specialty pharmacy
	Value based pharmacy payment
Therapeutic*	Ambulatory Care
 Drug induced diseases 	Innovative practice models
• HIV/STDs	Clinical pharmacist metrics for documenting services
 Cardiovascular/anticoagulation 	Population health
 Infectious diseases/antimicrobial stewardship 	Chronic disease state management
 Immunotherapy/oncologic developments 	 Pain (including opiate crisis and prevention)
• Diabetes	Cardiovascular risk/benefit profile of newer DM agents
 Drugs in the pipeline/emerging sciences 	Methods to determine what the patient needs beyond
Opioid stewardship	motivational interviewing, communicating with patient
 Pharmacogenomics/pharmacogenetics/customized care with genomics 	 Sustainability and expandability of services; payment models
CAR T cell therapy/toxicity	 Expanding scope of health system (how are community
Off label uses of medications	pharmacies interfacing with health-systems to expand
Dosing in ESRD	ambulatory care services)
Pediatrics for non-pediatric specialist	Interprofessional and intraprofessional teams
 Dosing in special populations 	highlighting highly effective/functional teams
	Defragmented care - coordinating care across
*Therapeutic/drug therapy topics are preferred by attendees.	specialties/disease states
	Academic detailing
Regulatory, Law, Accreditation	Miscellaneous
Opioid misuse	Advanced technician roles
 Controlled substances and diversion prevention 	Technician education and training/qualified technician
 Compounding 	shortage
 Effective advocacy for state's scope of practice 	 Drugs shortages: alternatives and finding solutions
Provider status	Transitions of care
	Improving access to care
	 Drug pipeline viral vectors: clinical application, pharmacy workflow, safety
