

## Correction Notice

*Handbook on Injectable Drugs, 16 Edition, by  
Lawrence A. Trissel*

The publishers of the Handbook on Injectable Drugs, 16<sup>th</sup> edition, wish to inform you of the following errors.

### **Diazepam Monograph**

Page 481, Additive Compatibility table

The Furosemide Conc/L entry (the third table column) should be 1 g.

### **Digoxin Monograph**

Page 486, Additive Compatibility table

The Furosemide Conc/L entry (the third table column) should be 1 g.

### **Doxorubicin Hydrochloride Monograph**

Page 550, *Syringes* section

The stability of doxorubicin hydrochloride 1 and 2 mg/mL should be 124 days.

### **Furosemide Monograph**

Page 728, Additive Compatibility table

The Furosemide Conc/L entries (the fifth table column) for Diazepam and Digoxin should both be 1 g.

We urge you to correct these errors in all copies of *HID* 16<sup>th</sup> ed. immediately and to communicate it to others on your staff who may use the book. The online and mobile versions of the *Interactive Handbook on Injectable Drugs* have been corrected.
