

ADVANCING COVID-19 VACCINE LEADERSHIP

A safe and effective vaccine is a critical countermeasure to the COVID-19 global pandemic. ASHP leverages best practices and lessons learned in pandemic preparedness, supply chain management, distribution, and clinical practice to support healthcare professionals in vaccination efforts against COVID-19.

Pharmacy Professionals

- Promote safety, science, and public health
- Serve as frontline care providers during the COVID-19 pandemic
- Valued as vaccination and medication experts

Pharmacy Roles

- Educate individuals about the importance of getting vaccinated
- Strengthen vaccine confidence through effective conversations
- Safeguard communities susceptible to illness
- Administer vaccines and monitor for adverse effects

ASHP Members

- Optimize vaccine supply and use
- Lead efforts in vaccine research, allocation, and patient administration
- Oversee vaccine storage and distribution

Vaccine Advocacy

ASHP advanced critical support for mass administration of vaccines including:

- Broader authorizations for pharmacist and pharmacy technician to order/administer vaccines
- Reimbursement for vaccine administration
- Priority immunization for pharmacists & technicians
- Transparent and robust vaccine approval/authorization processes
