SAMPLE JOB DESCRIPTION
Pharmacy Operations Coordinator

I. JOB SUMMARY

The Pharmacy Operations Coordinator functions as an operations and program leader dedicated to providing support of medication use systems and delivery of optimal medication therapy. The Pharmacy Operations Coordinator is responsible for coordinating specialty pharmacy services, and operation components for accreditation. They coordinate pharmacy practice programs, medication use systems, and quality initiatives to detect, mitigate, and prevent medication adverse events and work to ensure medication use is aligned with evidence-based best practices and regulatory standards.

The Pharmacy Operations Coordinator may have different assignments or functional roles based on experience, training, and skills. These assignments include direct patient care, operational services, or administrative leadership. Pharmacy Operations Coordinators with direct patient care roles proficiently provide clinical pharmacy services and integrated pharmacy operational services in a variety of practice settings in collaboration with pharmacists, physicians, nurses, and other personnel. They also work with interdisciplinary programs to deliver medication therapy management within patient care services and to ensure pharmaceutical care programs are appropriately integrated throughout the institution. Pharmacy Operations Coordinators with operational services roles adeptly function in and provide leadership for pharmacy operational areas, including but not limited to the call center, retail and specialty pharmacy areas. They also are responsible for active utilization of pharmacy automation, involvement in and oversight of medication dispensing programs, ensuring that medication preparation, prescription filling, dispensing, and computerized systems are in accordance with established policies and procedures. Pharmacy Operations Coordinators with administrative leadership roles directly oversee training and competency, medication safety systems, patient quality and outcomes programs, and regulatory compliance assurance.

Pharmacy Operations Coordinators all provide support of centralized and decentralized medication use systems as well as deliver optimal medication therapy to patients with a broad range of disease states. They participate in all necessary aspects of the medication use system while providing comprehensive and individualized pharmaceutical care to the patients in their assigned areas. Pharmacy Operations Coordinators serve as practice leaders for pharmaceutical care activities, assume special responsibility for drug utilization programs, and actively track and benchmark the outcomes of the pharmacy programs they coordinate in order to assure operational, clinical quality, and financial efficiency. Pharmacy Operations Coordinators actively identify practice related issues which require evaluation and facilitate improvement projects, quality initiatives, or healthcare provider education as needed to advance practice. They also facilitate the development of student, resident, and pharmacist training experiences and competencies and serve as primary preceptors for doctor of pharmacy students and pharmacy residents.
