** Materials for this course will be release on 09/23/2020 **

Critical Care Pharmacy Review Course, Pract Exam, and Core Therapeutic Modules Package (Cert # L209263)

Teaser: This online Specialty Review Course, Practice Exam, and Core Therapeutic Modules package will help you prepare for the Board of Pharmacy Specialty (BPS) examination. With this course, get comprehensive, practical guidance, with a variety of complex cases, including references for further study.

Tag: Certifications; Critical Care

ACPE Numbers: Various – see listing below
Pre-Sale Date: 09/02/2020
Content Release Date: 09/23/2020
Expiration Date: 08/31/2021
Activity Type: Application-based
CE Credits: 26.00 hours (ACPE only)
Activity Fee: $425 (ASHP member); $625 (non-member)

Accreditation for Pharmacists
The American Society of Health-System Pharmacists is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

Target Audience
These activities are intended for pharmacists who are seeking to update their knowledge and skills commensurate with a board certification examination in the areas listed below.

Activity Overview
This online course provides a robust preparatory curriculum for the pharmacy professional preparing for the Board of Pharmacy Specialties (BPS) Critical Care Specialty Certification Examination. Designed based on the domains, tasks, and knowledge statements developed by the BPS for the certification examination, this course will help you prepare for the exam by identifying areas needed for in-depth review of critical care pharmacy issues by:

• Reviewing pertinent clinical topics and practice skills
• Providing exam practice questions
• Listing valuable references for further study

This course is NOT intended for those obtaining recertification credit. To earn recertification credit, please see courses here:

These activities are part of the ASHP professional development program.
REVIEW COURSE:

This course consists of 21 activities (see table below) and provides up to 26 hours of continuing pharmacy education credit. The review course includes case-based presentations for application to real-life scenarios, a practice exam along with correct answers, and links to the reference sources, and domains, tasks, and knowledge statements. To help you further prepare, this package includes a compilation of practice questions in the same format and rigor to help you prepare for the BPS Specialty Examination.

Learning Objectives

At the end of the presentations, the pharmacist should be able to:

**Complex Case: Complications after Cardiac Surgery - Glucose, Sedation, and Thrombocytopenia**
ACPE #: 0204-0000-20-980-H01-P
- Develop treatment and monitoring plans for a complex post-cardiac surgery patient to include pain, agitation and delirium, glucose management, and heparin-induced thrombocytopenia.
- Evaluate the impact of critical illness on pre-existing conditions (e.g., endocrine disorders, pain).
- Summarize quality assurance and process improvement methods relevant to critical care.
- Assess the relationship between institutional guideline development and evidence-based critical care literature.

**Complex Case: Acute Coronary Syndrome**
ACPE #: 0204-0000-20-981-H01-P
- Develop treatment and monitoring plans for a complex critical care patient with acute coronary syndrome.
- Modify treatment and monitoring plans related to alterations of pharmacodynamics and pharmacokinetics in the critically ill.
- Select devices required for treatment and monitoring of a critical care patient.
- Select fluid, electrolyte and acid/base management and monitoring based on patient-specific factors.
Complex Case: Antithrombotic-Associated Intracerebral Hemorrhage  
ACPE #: 0204-0000-20-982-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with antithrombotic-associated intracerebral hemorrhage (ICH).  
- Select appropriate neurologic monitoring techniques.  
- Recommend agents for acute volume resuscitation and hemostasis (e.g., blood products, hemostatic agents).  
- Evaluate the impact of critical illness on preexisting conditions (e.g., cardiovascular diseases).  
- Recommend fluid and electrolyte management based on patient-specific factors.

Complex Case: Sepsis  
ACPE #: 0204-0000-20-983-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with an intra-abdominal infection, sepsis/SIRS, and shock.  
- Select appropriate routes of administration for medications in critically ill patients.  
- Modify treatment and monitoring plans related to alterations of pharmacodynamics and pharmacokinetics in the critically ill.  
- Recommend agents for acute volume resuscitation and hemostasis (e.g., crystalloids, colloids).

Complex Case: Hyperglycemic Emergency and Community-Acquired Pneumonia  
ACPE #: 0204-0000-20-984-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with hyperglycemic emergency and community-acquired pneumonia.  
- Select appropriate routes and methods of administration for medications in critically ill patients.  
- Select fluid, electrolyte and acid/base management and monitoring based on patient-specific factors.  
- Choose agents for acute volume resuscitation.  
- Identify medication safety issues in patients requiring care in the ICU.  
- Explain nutrition support in the critically ill patient.

Complex Case: Pneumonia  
ACPE #: 0204-0000-20-985-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with multiple conditions, including pneumonia and acute respiratory distress syndrome (ARDS).  
- Identify drug interactions and adverse drug events common in critical care and methods to document.

Complex Case: Oncologic Emergencies: Febrile Neutropenia, Tumor Lysis Syndrome, and Hypercalcemia of Malignancy  
ACPE #: 0204-0000-20-986-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with febrile neutropenia, tumor lysis syndrome, or hypercalcemia of malignancy.  
- Select fluid, electrolyte and acid/base management and monitoring based on patient-specific factors.  
- Evaluate the impact of critical illness on pre-existing conditions (e.g., cancer).

Complex Case: GI Bleeding and Acute Renal Failure  
ACPE #: 0204-0000-20-987-H01-P  
- Develop treatment and monitoring plans for a complex critical care patient with gastrointestinal bleeding, alcohol withdrawal, refeeding syndrome, hepatorenal syndrome, cirrhosis, and acute renal failure with renal replacement therapy.  
- Modify treatment and monitoring plans related to alterations of pharmacodynamics and pharmacokinetics in the critically ill.  
- Select appropriate routes of administration for medications in critically ill patients.  
- Recommend agents for acute volume resuscitation and hemostasis (e.g., blood products, hemostatic agents).
Practice Administration and Development Part 1
ACPE #: 0204-0000-20-988-H04-P

- Develop a plan to monitor and evaluate compliance with, and impact of, policies and guidelines (e.g., institutional, evidence based).
- Describe the application and integration of evidence-based critical care literature into institutional guidelines and processes.
- Evaluate regulatory/IRB requirements relative to conducting critical care research.
- Select quality assurance methods and improvement activities, including needs assessment techniques, aimed at enhancing the safety and effectiveness of medication-use processes in the critical care area.

Practice Administration and Development Part 2
ACPE #: 0204-0000-20-989-H04-P

- Identify metrics for evaluating the quality of critical care pharmacy services (e.g., lengths of ICU stay, mortality, cost-effectiveness, ROI).
- Examine the evidence-based literature that supports the value of critical care pharmacy.
- Summarize the factors that enhance the education and training of critical care pharmacists available in published documents from relevant professional societies (e.g., ASHP, ACCP, SCCM).

Statistics, Evidence-Based Medicine, and Clinical Trial Design
ACPE #: 0204-0000-18-934-H04-P

- Determine quality and appropriateness of a study by examining study design, statistical analysis, sources of bias, quality of conclusions, and interpretation of graphs.
- Determine clinical and statistical significance of a study outcome.
- Determine whether the study applies to a specified patient population.

CORE THERAPEUTIC MODULES:

The Core Therapeutic Modules Review Package consists of 10 activities in which faculty review clinical topics and practice skills using a case-based approach. The activities are designed to assist the learner in identifying knowledge gaps in preparation for a pharmacy specialty board examination. In addition to a recorded presentation, each activity includes links to resources for further self-study and a practice test developed in the same format and rigor as the specialty exam.

**Learning Objectives**
After participating in these CPE activities, learners should be able to:

**Select Topics in Acid-Base Disorders**  
ACPE #: 0204-0000-18-981-H01-P
- For the following specific acid-base disorders - respiratory, metabolic acid-base disorders including anion gap/non-anion gap acidosis, renal tubular acidosis, as well as the delta gap equation:
  - Interpret diagnostic and laboratory tests.
  - Determine the most appropriate treatment and monitoring based on patient-specific information and the most current guidelines.
  - Assess available information to identify drug-related problems and response to therapy.
  - Identify appropriate modifications of patient-specific treatment plans based on follow-up assessment.

**Select Topics in Infectious Diseases in Critical Care Patients**  
ACPE #: 0204-0000-19-600-H01-P
At the conclusion of this application-based educational activity, participants should be able to do the following:
- For the following specific infectious disease topics: urinary tract infections, meningitis, tuberculosis and catheter related infections:
  - Interpret laboratory and diagnostic tests.
  - Formulate the most appropriate treatment and monitoring plans based on patient-specific information and current guidelines.
  - Interpret available information to manage drug-related problems, evaluate response to therapy, and modify patient-specific treatment plans based on follow-up assessment.

**Select Neurology Topics in Critical Care Patients**  
ACPE #: 0204-0000-20-990-H01-P
- For the following specific critical care topics: status epilepticus, traumatic brain injury, ischemic stroke, subarachnoid hemorrhage:
  - Interpret laboratory and diagnostic tests.
  - Evaluate benefits and risks of drug therapy considering other medication, and other patient-specific factors.
  - Recommend the most appropriate treatment and monitoring plans based on patient-specific information and current guidelines.

**Alterations in Pharmacokinetics and Pharmacodynamics in Critical Care**  
ACPE #: 0204-0000-18-987-H01-P
- Review general pharmacokinetic (PK) and pharmacodynamics (PD) principles
- For the following PK/PD challenges – burns, obesity, pregnancy, device-related, extracorporeal membrane oxygenation (ECMO):
  - Interpret diagnostic and laboratory tests.
  - Determine most appropriate treatment and monitoring based on patient-specific data.
  - Assess available information to identify drug-related problems and therapy response.
  - Identify appropriate modifications of patient-specific treatment plans based on follow-up assessment.
Select Topics in Prevention and Supportive Care in Critical Care Patients
ACPE #: 0204-0000-20-991-H01-P
- For the following specific critical care topics - stress ulcer prophylaxis (SUP), venous thromboembolism (VTE) prophylaxis, bowel regimens, and ventilator associated pneumonia (VAP) prevention:
  - Interpret laboratory and diagnostic tests.
  - Recommend the most appropriate treatment and monitoring plans based on patient-specific information and current guidelines.

Select Topics in Toxicology
ACPE #: 0204-0000-18-994-H01-P
- For the following specific toxicology topics: acetaminophen, toxic alcohols, calcium channel blockers, beta blockers, opioids, and ecstasy:
  - Interpret diagnostic and/or laboratory tests.
  - Determine the most appropriate treatment and monitoring based on patient-specific information and the most current guidelines.
  - Assess available information to identify drug-related problems and response to therapy.
  - Identify appropriate modifications of patient-specific treatment plans based on follow-up assessment.

Select Topics in Pulmonary Disorders
ACPE #: 0204-0000-19-601-H01-P
- For the following specific pulmonary topics: asthma exacerbation, acute exacerbation of chronic obstructive pulmonary disease (COPD), and pulmonary embolism:
  - Interpret laboratory and diagnostic tests.
  - Formulate the most appropriate treatment and monitoring plans based on patient-specific information and current guidelines.
  - Interpret available information to manage drug-related problems, evaluate response to therapy, and modify patient-specific treatment plans based on follow-up assessment.

Cardiac Arrhythmias and Advanced Cardiac Life Support
ACPE #: 0204-0000-20-992-H01-P
- Interpret signs, symptoms and diagnostic tests for cardiac arrhythmias.
- Identify drug-related problems, including drug interactions and adverse effects, associated with pharmacotherapy of cardiac arrhythmias.
- Identify strategies to prevent drug-induced arrhythmias.
- Recommend therapy and monitoring for cardiac arrhythmias based on patient-specific information, current guidelines and Advanced Cardiac Life Support guided therapies.

Pharmacotherapy Considerations in the Management of Shock
ACPE #: 0204-0000-20-993-H01-P
- Interpret diagnostic and/or laboratory tests, vital signs, and clinical presentation in order to differentiate types of shock (hypovolemic, distributive, cardiogenic)
- Compare and contrast the pharmacologic agents utilized in shock
- Recommend therapy and monitoring based on patient-specific information and current guidelines for the treatment of shock
**Materials for this course will be release on 09/23/2020**

**Fluid, Electrolytes, and Nutrition**

ACPE #: 0204-0000-19-602-H01-P

At the conclusion of this application-based educational activity, participants should be able to do the following:

- Interpret laboratory and diagnostic tests to evaluate fluid, electrolyte and nutrition status.
- Select the appropriate route for nutrition administration, and evaluate if nutrition needs are being met based on patient-specific information and current guidelines.
- Manage drug-related electrolyte interactions and nutrient interactions.
- Determine the most appropriate therapy and monitoring in patients with fluid, electrolyte, and nutritional disorders based on patient-specific information and current guidelines.

**REVIEW COURSE:**

**FACULTY**

Angela L. Bingham, Pharm.D., BCPS, BCNSP, BCCCP  
Associate Professor of Clinical Pharmacy, PGY2 Critical Care Pharmacy Residency Program Director  
Philadelphia College of Pharmacy, University of the Sciences  
Philadelphia, Pennsylvania  
Critical Care Clinical Pharmacy Specialist  
Cooper University Hospital  
Camden, New Jersey

Brian Dee, Pharm.D., BCCCP, BCNSP  
Clinical Pharmacy Specialist – Critical Care/Nutrition Support  
The University of Texas MD Anderson Cancer Center  
Houston, Texas

Mary Hess, Pharm.D., FASHP, FCCM, FCCP, BCCCP  
Associate Dean  
Professor, Pharmacy Practice  
Jefferson College of Pharmacy  
Philadelphia, Pennsylvania

G. Morgan Jones, Pharm.D., BCCCP, FCCM  
Clinical Pharmacy Specialist - Neurocritical Care  
Methodist University Hospital  
Memphis, Tennessee  
Assistant Professor of Neurology, Neurosurgery, and Clinical Pharmacy and Translational Sciences  
University of Tennessee Health Sciences Center  
Memphis, Tennessee

Patricia Kienle, B.S.Pharm., MPA, FASHP  
Director, Accreditation and Medication Safety  
Cardinal Health Innovative Delivery Solutions  
Wilkes-Barre, Pennsylvania

John Marshall, Pharm.D., BCPS, BCCCP, FCCM  
Director, Clinical Pharmacy Programs  
Massachusetts General Hospital  
Boston, Massachusetts

Disclosures
In accordance with the Accreditation Council for Continuing Medical Education’s Standards for Commercial Support and the Accreditation Council for Pharmacy Education’s Standards for Commercial Support, ASHP requires that all individuals involved in the development of activity content disclose their relevant financial relationships. A person has a relevant financial relationship if the individual of his or her spouse/partner has a financial relationship (e.g. employee, consultant, research grant recipient, speakers bureau, or stockholder) in any amount occurring the in the last 12 months with a commercial interest whose products or series may be discussed in the educational activity content over which the individual has control. The existence of these relationships is provided for the information of participants and should not be assumed to have an adverse impact on the content.

All faculty and planners for ASHP education activities are qualified and selected by ASHP and required to disclose any relevant financial relationships with commercial interests. ASHP identifies and resolves conflicts of interest prior to an individual’s participation in development of content for an educational activity. Anyone who refuses to disclose relevant financial relationships must be disqualified from any involvement with a continuing pharmacy education activity.

Brian Dee: Spouse, Pfizer employee.

All other planners, presenters, and reviewers of this session report no financial relationships relevant to this activity.

Methods and CE Requirements
Activities can be completed in any order. Each activity consists of audio, video, and/or PDFs and evaluations. Learners must review all content and complete the evaluations to receive continuing pharmacy education credit for each activity.

Follow the prompts to claim, view, or print the statement of credit within 60 days after completing the activity.

System Technical Requirements
Courses and learning activities are delivered via your Web browser and Acrobat PDF. For all activities, you should have a basic comfort level using a computer and navigating web sites.

View the minimum technical and system requirements for learning activities.

Development
These activities were developed by ASHP.

To maintain its strict, independent standards for certification, BPS does NOT endorse or provide review information, preparatory courses, or study guides for Board Certification Examinations.
