Pediatric Pharmacy Review Course, Pract Exam, and Core Therapeutic Modules Package (Cert # L209284)

Teaser: This online Specialty Review Course, Practice Exam, and Core Therapeutic Modules package will help you prepare for the Board of Pharmacy Specialty (BPS) examination. With this course, get comprehensive, practical guidance, with a variety of complex cases, including references for further study.

Tag: Certifications; Pediatric Pharmacy

ACPE Numbers: Various – see listing below
Pre-Sale Date: 09/02/2020
Content Release Date: 09/23/2020
Expiration Date: 08/31/2021
Activity Type: Application-based
CE Credits: 25.50 hours (ACPE only)
Activity Fee: $425 (ASHP member); $625 (non-member)

Target Audience
These activities are intended for pharmacists who are seeking to update their knowledge and skills commensurate with a board certification examination in the areas listed below.

Activity Overview
This online course provides a robust preparatory curriculum for the pharmacy professional preparing for the Board of Pharmacy Specialties (BPS) Pediatric Pharmacy Specialty Certification Examination. Designed based on the domains, tasks, and knowledge statements developed by the BPS for the certification examination, this course will help you prepare for the exam by identifying areas needed for in-depth review of pediatric pharmacy issues by:

- Reviewing pertinent clinical topics and practice skills
- Providing exam practice questions
- Listing valuable references for further study

This course is NOT intended for those obtaining recertification credit. To earn recertification credit, please see courses here:

These activities are part of the ASHP professional development program.
REVIEW COURSE:

This course consists of 11 activities (see table below) and provides up to 16 hours of continuing pharmacy education credit. The Review Course includes case-based presentations for application to real-life scenarios, a practice exam along with correct answers, and links to the reference sources, and domains, tasks, and knowledge statements. To help you further prepare, this package includes a compilation of practice questions in the same format and rigor to help you prepare for the BPS Specialty Examination.

Learning Objectives

At the end of the presentations, the pharmacist should be able to:

**Complex Case: Deep Vein Thrombosis and Metabolic Syndrome**

ACPE #: 0204-0000-20-994-H01-P

- Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including deep vein thrombosis, type 2 diabetes mellitus, dyslipidemia, and hypertension.
- Identify resources and treatment options for sexually transmitted infections.
- Select appropriate monitoring considerations of anticoagulation medications.
- Recognize the impact of pharmacogenomic differences on warfarin therapy.
Complex Case: Diabetic Ketoacidosis
ACPE #: 0204-0000-20-995-H01-P
• Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including diabetic ketoacidosis, type 1 diabetes mellitus, and urinary tract infection.
• Calculate maintenance and replacement fluid requirements and urine output.
• Identify factors affecting medication adherence.
• Recommend appropriate dosing of insulin based on patient age and weight.
• Select an effective method of delivery for insulin.

Complex Case: Acute Asthma
ACPE #: 0204-0000-20-996-H01-P
• Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including acute and chronic asthma, ADHD, acne and GERD.
• Evaluate essential components of social history, including smoke exposure and home environment.
• Formulate a plan to address barriers to patient education and adherence, including age, language, cultural considerations, and inhaler technique.
• Describe the impact of age on classification and management of asthma.
• Assess available resources to improve access to medications, including patient assistance programs.

Complex Case: Pneumonia and Septic Shock
ACPE #: 0204-0000-20-997-H01-P
• Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including pneumonia, septic shock, and acute kidney injury.
• Calculate creatinine clearance, fluid requirements, and urine output in pediatric patients.
• Apply scoring systems to assess pediatric patients.
• Select appropriate dosing for medications based on renal dysfunction and/or replacement modalities.
• Differentiate vital signs between stable and critically-ill pediatric patients.

Complex Case: Acute Lymphoblastic Leukemia and Supportive Care
ACPE #: 0204-0000-20-998-H01-P
• Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including acute lymphoblastic leukemia (ALL), tumor lysis syndrome, febrile neutropenia, invasive aspergillosis infection, and Clostridium difficile infection.
• Select appropriate medication dose modifications related to hepatic impairment.

Regulatory and IRB Considerations
ACPE #: 0204-0000-20-999-H03-P
• Identify appropriate off-label use of medications in the pediatric population.
• Recognize IRB requirements for documentation of clinical studies
• List characteristics of patients who require informed assent/consent.
• Recognize federal legislation relevant to the use of medications in pediatric patients.
**Materials for this course will be release on 09/23/2020**

**Complex Case: Sickle Cell Disease with Vaso-Occlusive Crisis**
ACPE #: 0204-0000-20-600-H01-P

- Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions, including a vaso-occlusive crisis, cellulitis, constipation, and need for immunizations.
- Select most appropriate patient controlled analgesia regimen based on vaso-occlusive crisis severity.
- Apply pharmacodynamic principles when selecting appropriate antibiotic regimens.
- Identify required immunizations for adolescents, including patients with risk factors for vaccine-preventable diseases.

**Medication Error and Practice Management**
ACPE #: 0204-0000-20-601-H05-P

- Incorporate position statements, white papers, national guidelines from recognized regulatory organizations into institutional policies and procedures related to:
  - Medication reconciliation
  - Appropriate drug preparation and delivery (e.g., extemporaneous compounding and standardized concentrations)
  - Selection of appropriate equipment/technology and decision support.
  - Adverse drug event monitoring and reporting, or
  - Metrics for evaluating quality of pediatric pharmacy services.

**Complex Case: Neonatal Sepsis**
ACPE #: 0204-0000-20-602-H01-P

- Develop appropriate treatment and monitoring plans for a complex neonatal patient with multiple conditions, including patent ductus arteriosus, apnea of prematurity, early and late onset sepsis, and necrotizing enterocolitis.
- Evaluate the clinical and therapeutic implications of placental transfer of medications.
- Identify age-specific pharmacokinetic differences among neonates, infants, children, and adolescents.
- Apply FDA alerts for adverse drug events and drug-drug interactions into clinical practice.
- Identify characteristics that facilitate transfer of medications into the breast milk.

**Complex Case: Status Epilepticus and Cardiopulmonary Resuscitation**
ACPE #: 0204-0000-20-603-H01-P

- Develop appropriate treatment and monitoring plans for a complex pediatric patient with multiple conditions and needs, including status epilepticus, cardiopulmonary resuscitation, and sedation/analgesia.
- Differentiate treatment options in cardiopulmonary arrest based upon patient presentation.
- Select the appropriate dose and route of administration for medications.
- Assess the need and processes for reporting adverse drug events.
- Identify cultural considerations related to treatment and counseling of the pediatric population.
- Distinguish between the four preceptor roles.

**Statistics, Evidence-Based Medicine, and Clinical Trial Design**
ACPE #: 0204-0000-18-934-H04-P

- Determine quality and appropriateness of a study by examining study design, statistical analysis, sources of bias, quality of conclusions, and interpretation of graphs.
- Determine clinical and statistical significance of a study outcome.
- Determine whether the study applies to a specified patient population.
CORE THERAPEUTIC MODULES:

The Core Therapeutic Modules Review Package consists of 9 activities in which faculty review clinical topics and practice skills using a case-based approach. The activities are designed to assist the learner in identifying knowledge gaps in preparation for a pharmacy specialty board examination. In addition to a recorded presentation, each activity includes links to resources for further self-study and a practice test developed in the same format and rigor as the specialty exam.

Learning Objectives
After participating in these CPE activities, learners should be able to:

Select Topics in Pediatric Critical and Emergency Care
ACPE #: 0204-0000-18-995-H01-P
- For the following specific critical and emergency medicine topics in pediatric patients: traumatic brain injury, select toxicological emergencies, and medication dosing in ECMO
  - Interpret diagnostic and/or laboratory tests, vital signs, and clinical presentation.
  - Determine the most appropriate therapy and monitoring based on patient-specific information and the most current guidelines.
  - Identify and manage underlying disorders.

Select Topics in Pediatric Cardiovascular Disease
ACPE #: 0204-0000-18-996-H01-P
- For the following specific pediatric cardiovascular topics: congenital heart disease (VSD, ASD, TOF, coarctation of the aorta and hypoplastic left heart), Kawasaki disease, and PALS management of bradycardias and tachycardias with pulse:
  - Interpret signs, symptoms and diagnostic tests.
  - Identify drug-related problems, including drug interactions.
** Materials for this course will be release on 09/23/2020 **

- Determine the most appropriate therapy and monitoring based on patient-specific information and the most current guidelines.
- Utilize PALS to determine appropriate therapy for bradycardia and tachycardia.

**Select Topics in Pediatric Hematology Oncology**
ACPE #: 0204-0000-17-935-H01-P
For the following specific hematology and oncology topics: chemotherapy supportive care (e.g., acute nausea/vomiting and mucositis), immune thrombocytopenia, and anemia:
- Interpret signs, symptoms and diagnostic tests.
- Assess available information to identify drug-related problems and response to therapy.
- Identify appropriate modifications and supportive care plans based on patient-specific follow up assessment.

**Select Topics in Pediatric Infectious Diseases Part 1**
ACPE #: ACPE #: 0204-0000-19-996-H01-P
At the conclusion of this application-based educational activity, participants should be able to do the following:
- For the following specific infectious diseases in pediatric patients: otitis media, bronchiolitis, tuberculosis, meningitis, and pneumonia
- Identify and select an age-appropriate therapeutic regimen to include monitoring for safety and efficacy based on the most current guidelines and standard of care

**Select Topics in Pediatric Infectious Diseases Part 2**
ACPE #: 0204-0000-20-604-H01-P
- Develop treatment and monitoring plans based on patient-specific information and the most current guidelines for a pediatric patient with HIV, Herpes Simplex Virus Types 1 and 2, or systemic fungal infections.

**Select Topics in Pediatric Neurology Part 1**
ACPE #: 0204-0000-18-997-H01-P
- Determine the most appropriate treatment and monitoring based on patient-specific information and the most current guidelines
- Assess available information to identify drug-related problems and response to therapy
- Identify appropriate modifications of patient-specific treatment plans based on follow up assessment

**Select Topics in Pediatric Neurology Part 2**
ACPE #: 0204-0000-19-997-H01-P
- For the following specific neurology topics: Seizures (i.e., febrile seizures, neonatal seizures, infantile spasms, absence seizures, and Lennox-Gastaut syndrome), chronic management of anti-epileptics (including adverse drug events related to treatment such as hepatic with valproate, phenobarbital), ketogenic diet
  - Determine the most appropriate treatment and monitoring based on patient-specific information and the most current guidelines.
  - Assess available information to identify nutrition and drug-related considerations.
  - Identify appropriate modifications of patient-specific treatment plans based on follow up assessment.
** Materials for this course will be release on 09/23/2020 **

Select Topics in Pediatric Nutrition  
ACPE #: 0204-0000-20-605-H01-P  
• Evaluate if nutrition needs of a pediatric patient are being met based on assessment of appropriate growth and development.  
• Develop treatment and monitoring plans based on patient-specific information and the most current guidelines for a pediatric patient with parenteral or enteral nutrition needs.  
• Evaluate patients for weight (overweight or obese) based on current guidelines.

Select Topics in Pediatric Pulmonary Disease: Cystic Fibrosis and Chronic Asthma  
ACPE #: 0204-0000-20-606-H01-P  
• Interpret relevant clinical and laboratory data and results of diagnostic procedures in a pediatric patient with an exacerbation of cystic fibrosis or chronic asthma.  
• Identify relevant differences in laboratory sampling for pediatric patients (e.g., blood volume; method, frequency and timing of sampling).  
• Develop the most appropriate therapy and monitoring plans based on patient-specific information and the most current guidelines.

REVIEW COURSE:

FACULTY
Emily Benefield, Pharm.D., BCPPS, BCPS  
Advanced Clinical Pharmacist  
Primary Children’s Hospital  
Salt Lake City, Utah  

Peter N. Johnson, Pharm.D., BCPPS, BCPS, FCCM, FPPAG  
Associate Professor of Pharmacy Practice  
University of Oklahoma College of Pharmacy  
Clinical Pharmacy Specialist--Pediatric Critical Care  
The Children’s Hospital at OU Medical Center  
Oklahoma City, Oklahoma  

Kevin Patrick Lonabaugh, Pharm.D., BCACP, AAHIVP, AE-C  
Clinical Pharmacist - Pediatric Ambulatory Care  
University of Virginia Children’s Hospital  
Charlottesville, Virginia  

Rachel S. Meyers, Pharm.D., BCPPS, BCPS  
Clinical Associate Professor  
Ernest Mario School of Pharmacy, Rutgers  
The State University of New Jersey  
Piscataway, NJ  
Pediatric Pharmacist  
Saint Barnabas Medical Center  
Livingston, New Jersey
** Materials for this course will be release on 09/23/2020 **

Jamie L. Miller, Pharm.D., BCPPS, BCPS, FPPAG

University of Oklahoma College of Pharmacy  
Oklahoma City, Oklahoma

Jill A. Morgan, Pharm.D., BCPPS, BCPS  
Professor and Chair  
University of Maryland School of Pharmacy  
Baltimore, Maryland

Kristen Nichols, Pharm.D., BCPPS, BCPS-AQ ID  
Associate Professor of Pharmacy Practice  
Butler University College of Pharmacy and Health Sciences  
Indianapolis, Indiana

Jennifer L. Thackray, Pharm.D., BCPPS, BCPS  
Pediatric Oncology Clinical Pharmacy Specialist  
Memorial Sloan Kettering Cancer Center  
New York, New York

Lisa T. Thames, Pharm.D., BCPS  
Assistant Director, Pharmacy Services  
UF Health Shands Hospital  
Gainesville, Florida

Emily S. Waite, Pharm.D., BCOP  
Pediatric Hematology Oncology Pharmacist  
Children's of Alabama  
Birmingham, Alabama

**CONTENT MATTER EXPERTS**

Peter N. Johnson, Pharm.D., BCPPS, BCPS, FCCM, FPPAG

Disclosures
In accordance with the Accreditation Council for Continuing Medical Education’s Standards for Commercial Support and the Accreditation Council for Pharmacy Education’s Standards for Commercial Support, ASHP requires that all individuals involved in the development of activity content disclose their relevant financial relationships. A person has a relevant financial relationship if the individual of his or her spouse/partner has a financial relationship (e.g. employee, consultant, research grant recipient, speakers bureau, or stockholder) in any amount occurring the in the last 12 months with a commercial interest whose products or series may be discussed in the educational activity content over which the individual has control. The existence of these relationships is provided for the information of participants and should not be assumed to have an adverse impact on the content.

All faculty and planners for ASHP education activities are qualified and selected by ASHP and required to disclose any relevant financial relationships with commercial interests. ASHP identifies and resolves conflicts of interest prior to an individual’s participation in development of content for an educational activity. Anyone who refuses to disclose relevant financial relationships must be disqualified from any involvement with a continuing pharmacy education activity.

All planners, presenters, and reviewers of this session report no financial relationships relevant to this activity.

Methods and CE Requirements
Activities can be completed in any order. Each activity consists of audio, video, and/or PDFs and evaluations. Learners must review all content and complete the evaluations to receive continuing pharmacy education credit for each activity.

Follow the prompts to claim, view, or print the statement of credit within 60 days after completing the activity.

System Technical Requirements
Courses and learning activities are delivered via your Web browser and Acrobat PDF. For all activities, you should have a basic comfort level using a computer and navigating web sites.

View the minimum technical and system requirements for learning activities.

Development
These activities were developed by ASHP.

To maintain its strict, independent standards for certification, BPS does NOT endorse or provide review information, preparatory courses, or study guides for Board Certification Examinations.
