

Important Correction Notice

Basic Skills in Interpreting Laboratory Data, 6th Edition (P5488)
By Mary Lee

The publishers wish to inform you of a correction in Chapter 6, page 110.

On page 110, Chapter 6, Interpretation of Serum Drug Concentrations, the equation before the heading “Valproic Acid” in the right column should appear as:

normalized PHT concentration = measured PHT concentration
+ (0.01 × VPA concentration × measured PHT concentration)

In the published book, the equation has boxes where multiplication symbols should appear.

Please affix the enclosed sticker on page 110 of your book to correct your copy.
