POSTERBOARD SPECIFICATIONS

ASHP will provide the following for your poster presentations:

A poster board approximately 4 feet high by 8 feet wide
(45 inches X 91 inches) of usable space.

A table in front of the board

HOW TO PREPARE A POSTER FOR PRESENTATION

1. Create a banner at the top of the poster:

With the poster title and author(s) and the health system name.
Lettering for this sign should not be less than one inch (1") high (30-36 points).

2. Prepare a written summary of your project.

Organize the poster sections as follows:

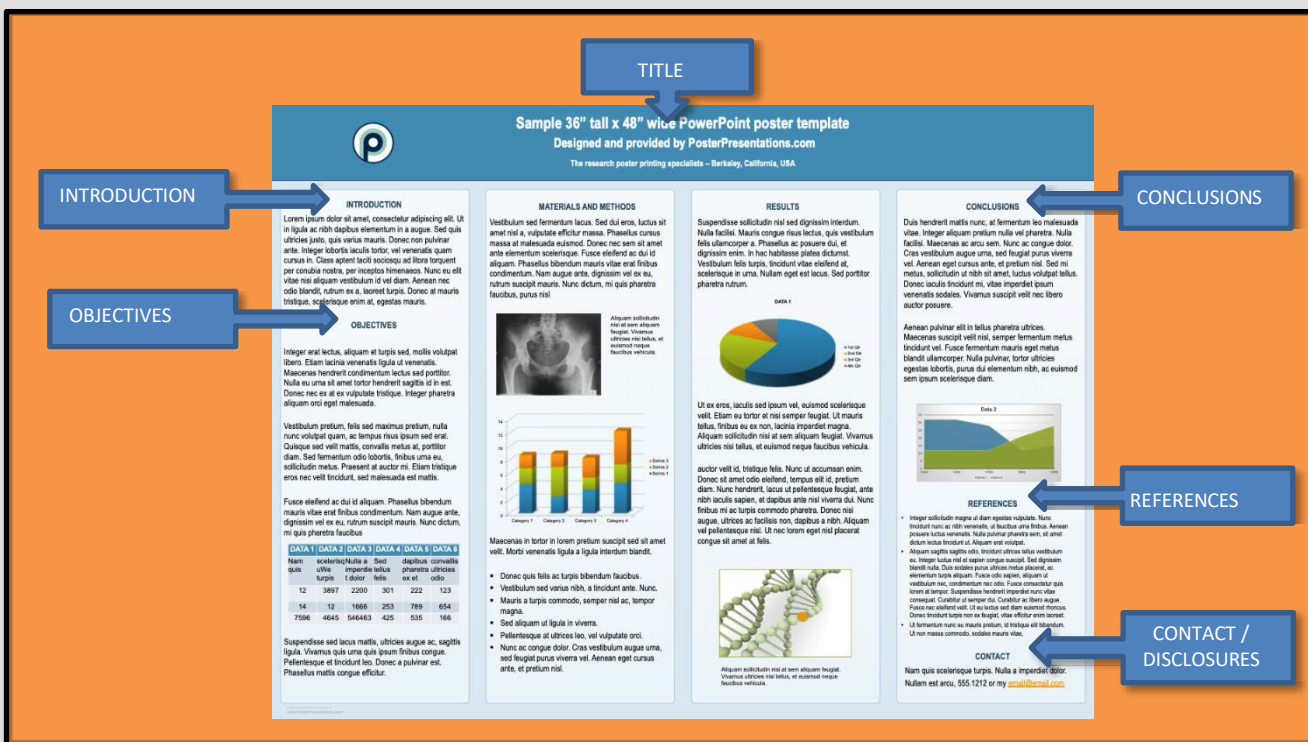

- Introduction/purpose of the study or project
- Objectives
- Methods used in the study or project
- Results of the study or project
- Conclusions/evaluation of the study or project.
- References
- Author contact and disclosures of all authors (required) on right bottom corner of poster.
If nothing to disclose, "Nothing to Disclose" must be displayed next to the author name in place of a disclosure".

3. Viewers should be able to analyze and evaluate your poster without listening to an explanation or reading a report.

To improve the readability of your poster, consider the following:

- **Text** – Use a minimal amount of text material. Focus on two or three points maximum. Use one line statements or bullet points to highlight key points rather than full sentences. Break up large amounts of blocked text by using indented paragraphs or subheadings.
- **Organization** – Follow the "tried and true" arrangement of objectives, methods, results, and conclusions. Arrange these materials like newspaper columns on the poster board.
- **Graphics** – Use simple charts, graphs, tables, clip art, drawings, symbols, and photos to illustrate key points.
- **Font Type** – Use large lettering, at least 3/8" high (20-30 points), but do not use all upper case letters. Font should be simple and easy to read (i.e., Times New Roman, Calibri, etc). The text should be readable from approximately three to six feet away or it may be too small.
- **Materials** – Laminated posters and posters made of heavy material are difficult to keep in position on the poster board. Please consider using a lighter weight material. Also, laminating your poster materials may make it difficult to read because of the reflected lighting in the convention centers. Posters ordered from PosterPresentations.com meet the ASHP specifications.
