

Table of Contents

PART I: The Fundamentals of Pharmaceutical Calculations

I.1: Fundamentals of Measurement and Calculation

I.2: Systems of Measurement and Conversions

I.3: Principles of Weighing and Measuring

Progress Assessment Test 1

I.4: Prescriptions and Drug Orders

I.5: Reducing and Enlarging Formulas

I.6: Density, Specific Gravity, and Specific Volume

I.7: Concentration Statements

I.8: Concentrating and Diluting Solutions or Mixtures

I.9: Isotonicity

I.10: Concentration of Solutes and Osmolarity

I.11: Specific Dosing Calculations, Thermometry,
and Pharmacogenomics

I.12: Reconstitution of Solutions and Suspensions and
of Flow Rate Calculations

PART II: Answers to Problems and Selected Problem Solutions
